

Vancouver PM BA World Presentation
October 29, 2019
11:15 am – 12:15

PM, EA, BA Success Insights

Leaders steering business transformation initiatives, in public and private enterprise, need skilled strategic PM's, EA's, and BA's to deliver collaboratively with a shared vision to communicate and ensure business outcomes. We need to reduce risks of transformation failures by developing skills and correctly leverage productivity tools. Transformation failures are increasing weekly however some leading organizations are succeeding. Why? Find out why and how to succeed by looking over the shoulders of a practitioner with many years of experience in the trenches of process improvement and transformation success.

Delivering large scale, collaborative, and repeatable transformations with diverse stakeholders is not the experience of most PM's, EA's, and BA's. Learn insights on how skilled and disciplined workers are collaborating to dramatically improve business value. Gain insights on how a few high performing enterprises practice holistic systems thinking to succeed the first time and avoid traditional project and transformation failures.

Learn directly from recent case studies on how to succeed when planning and executing a transformation. Learn insights to share with your clients that accelerate transformations, improve business flexibility, and reduce the severe risk of transformation failures. Learn how Project Managers., Enterprise Architects, and Business Analysts working together may ensure business agility while reducing transformation risks and delivering business value. It's all about communication and people.

Ramsay Millar, INTEGRATE IT

LinkedIn <https://www.linkedin.com/in/ramsay-millar-616b915/>

Ramsay Millar is a proven consultant in the areas of business process improvement, business architecture, and enterprise architecture transformations involving communication and collaboration of business leaders, project managers, enterprise architects, and business analyst's that drive COTS or Dev Ops solutions.
